SUMMARY

Full Stack developer with expertise in front-end and back-end development, experienced in leading cross-functional teams.

EXPERIENCE

Biz of Dev

January 2025 – Present

Full Stack Developer

Remote (Islamabad, Pakistan)

- Develop and maintain scalable web applications using Next.js, React, Node.js, and Python, ensuring high performance and responsiveness.
- Integrate Shopify GraphQL APIs to enhance e-commerce functionalities, improving data retrieval efficiency and user experience.
- Collaborate with cross-functional teams, including product managers and designers, to deliver user-centric solutions aligned with business objectives.
- Implement responsive UI components, optimizing for accessibility and performance across various devices and browsers.
- Utilize MongoDB and PostgreSQL for database management, ensuring data integrity and efficient query handling.

DevelopersHub Corporation©

September 2024 – November 2024

Full Stack Developer

Islamabad, Pakistan

- Developed innovative projects using the MERN stack during a 6-week internship at DevelopersHub Corporation, delivering high-quality, production-ready solutions.
- Built a full-stack Task Management Application with React, Node.js, and mongoDb, including full database integration and comprehensive testing to ensure.
- Integrated front-end and back-end components for a seamless user experience.

PROJECTS

TextTalk | *React, Next.js, Tailwind, Zod, TypeScript, langchain.js, OpenAi*

January 2024

- Developed a full-stack SaaS that allows users to upload PDFs and interact with the content using AI.
- Integrated LangChain.js and Pinecone to provide persistent AI memory and vector storage, enabling context-aware, real-time responses from documents.
- Implemented secure authentication with Clerk, drag-and-drop file uploads, and infinite message loading for smooth user experience.
- [Live Link](#) | [Github Link](#)

Imaginify | *React, Next.js, Tailwind CSS, Zod, TypeScript, Prisma, Clerk*

February 2024 – March 2024

- Built **Imaginify**, an AI-powered SaaS platform that leverages Cloudinary's AI APIs to perform advanced image transformations.
- Implemented key features such as Image Restoration, Object Removal, and Background Removal, enabling users to edit images effortlessly.
- Designed a fully responsive, modern UI using Tailwind CSS and Shadcn, and developed secure server-side logic with Prisma and Clerk for user authentication and credit-based access.
